

Here are some points that are unique to this ROTARY Engraver.

1. Standard 2 Year Warranty
2. Standard with 7 5/8 inch clearance (raising of Gantry)
3. Touch screen control panel that is menu driven and re-programmable-Run thru G-code Console
4. We can recall jobs across a network (from more than one computer) Stacking jobs in Directories
5. We have a fully interactive automatic optical proximity surface sensor – senses on every cutter down – that is also programmable
6. Comes standard with Xenetech Graphics Workstation software (our own--no other rotary manufacturer has its own windows based CAD/CAM software package)
XP/Windows based that has variable text input, multiple and batch layout capabilities, automatic and grid cutout, corner round, engrave by color, 15 different color options to assign cutter changes, 80 plus engraving fonts, can engrave true-type fonts, ability to easily import vector based graphics from other windows based programs to engrave
7. We use half-pitch Leadscrews on x-y and z axis and 3-position self adjusting Leadscrew nuts that refresh on each lubrication, and additionally only need to be lubricated 2-3 times a year based on normal operation (40 hours per week)
8. We use solid couplers on x, y and z axis
